Meghan Kulkarni

Senior Product Designer

New York, NY · meghan.kulkarni@gmail.com · +1 917 447 2584 · **meghanportfolio.com** · linkedin.com/in/meghankul

PROFESSIONAL SUMMARY

Senior Product Designer specializing in complex, AI-driven workflows for high-stakes domains. I lead discovery through delivery, turning ambiguous operational problems into shipped products for technical and non-technical users, and I build internal tools to streamline processes and help with business validation.

WORK EXPERIENCE

Senior Product Designer · Air Space Intelligence, Remote *Apr 2026 – Present*

- Designed core workflows for SMART (Strategic Management of Airspace, Routes, and Trajectories) for air traffic controllers, supporting ASI's **$875M FAA contract**.
- Designed OMEN (Open Mission Engine), a platform for building and deploying mission applications for the Mobility Air Forces, including a **tactical moving map** for aircrews, as part of a **$21M DIU award**.
- **Lead design and discovery across 14 products** spanning commercial, defense, and energy, working through ambiguity to identify user needs from requirements.
- Worked onsite with Air Force clients to learn current workflows and built **NITMRE FX Flight Planning**, cutting flight planning from **2–3 hours to 15–20 minutes** with accurate verification and familiar legacy patterns.
- Built internal tools for deployment leads and engineers: a UI Generation Tool that builds products in **as little as 10 minutes** for in-person demos, and a Business Validation tool that scores features against requirements.

Founding Product Designer, IT Service Management · Accrete AI, New York, NY *Feb 2022 – Mar 2026*

- **Sole Designer on a classified U.S. Government threat detection application**; designed mission-critical interfaces used by analysts to identify and respond to national security threats in real time.
- Designed prototypes and interaction patterns for Cassini, an IT Service Management application; influenced 3 major enterprise partnerships contributing to **$200M+ in cost value realization**.
- Led discovery, user research, and iterative design for IKE (Internal Knowledge Engine), an agentic AI knowledge platform, driving **20 new product features**.
- Architected and shipped **Paradigm**, a scalable design system in Figma, promoting consistency across all Accrete product lines and establishing consistent UX patterns for AI-driven interfaces.

Product Designer · Avesha, Burlington, MA *Dec 2021 – Feb 2022*

- Designed features for a Kubernetes cloud infrastructure product, leading offshore designers and developers.
- Built an auditing system that surfaced 50+ critical bugs, working with engineering to resolve blockers.

EDUCATION

Northeastern University *Boston, MA*

Bachelor of Science, Experience Design & Business Administration · Scaling Design Systems certified · Dribbble Private Pilot License candidate · SDI Scuba certified

SKILLS & TOOLS

Tools: Figma, Figma to Code, Storybook, Claude Code, Cursor, Agent MCP, HTML, CSS, React

Domain: Defense, Aviation, Air Traffic Management, Classified Government Products, Finance, AI Agents, B2B SaaS, Enterprise Software, AI/ML Products, ITSM, 0-to-1 Product Development, Design Strategy
